ZOHEB MAMOO

Software Engineer & Creative Technologist | Developer Tools & Automation

Bengaluru, India | Open to remote work and relocation | +91 7593094525 | notreallyzoh@gmail.com

Portfolio: notreallyzoh.github.io/site/dev/ | GitHub: github.com/notreallyzoh

StudioHQ demo: notreallyzoh.github.io/site/showcases/studiohq/console/

PROFILE

Software engineer with three years at Cytel and subsequent independent full-stack delivery. Combines JavaScript/TypeScript and Node.js development with C++ testing experience, CI/CD and agent-assisted tooling. Built and previously self-hosted StudioHQ to coordinate tasks, build requests, knowledge and human review.

TECHNICAL SKILLS

Languages & applications: JavaScript, TypeScript, Node.js, React, Python, C++, Payload CMS.

Tools & delivery: Git, CI/CD, Azure, automated testing, API integration, agent CLI integration, Model Context Protocol (MCP), AI-assisted coding, FFmpeg, technical documentation.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Designer / Developer & Creative Technologist

Independent practice | June 2025 - Present

- Designed and built React-based websites for ALIFA, BZ Fitness, NEXSTEG, Roca Fuels and Adaline, owning design and implementation through agency handover.
- Built ALIFA's custom Payload e-commerce admin, implemented custom integrations and handled server deployment, DevOps and CI/CD. Used TypeScript in client work.
- Built StudioHQ tooling around agent work, build-request dispatch and review records; documented implementation, failure modes and the boundaries of its automation.

Software Development Engineer (R&D) | Cytel

June 2022 - June 2025

- Implemented C++ mathematical models for clinical trial studies and contributed to simulation features and user interfaces, working with statisticians on specialist requirements.
- Contributed to migration of legacy C++/C#/XML software to React, C++, JSON and Azure.
- Achieved 90% code coverage in single-arm survival study development.

DEVELOPER TOOLS PROJECT

StudioHQ | Developer workflow and agent operations console

Node.js, JavaScript, Markdown/JSON, Git, FFmpeg, agent CLI tools | Self-directed project

- Built a windowed console connecting task tracking, agent activity, media workflows and human review to an Obsidian-compatible, Git-backed knowledge workspace.
- Previously operated agents on a self-hosted server with DuckDNS/Caddy access and Telegram standup and end-of-day updates; paused hosting to reduce costs.
- Integrated agent CLI tools, build-request dispatch and persisted review decisions. Added a library workflow that turns references into lesson cards and proposed skill amendments.
- Documented a failure where headless workers exited before verification; recorded synchronous verification and artifact checks as corrective operating rules.
- Documented source modules, workflow limitations and verification boundaries. Published a read-only console demo with historical reviews, workflow records and screenshots.

EDUCATION

B.Tech, Electronics and Computer Engineering | VIT Chennai | 2018 - 2022 | GPA: 8.05

CERTIFICATIONS & LEADERSHIP

Google IT Support Professional Certificate (2022); Security Analyst GOLD, NASSCOM (2021); IBM Cloud Native & Multicloud Applications (2022).

Vice Captain, Dreadnaught Robotics; Creative Head, IEEE Computer Society VIT; Teaching Assistant, VITeach (student social outreach).
