ZOHEB MAMOO

Software Engineer · Creative Technologist · New Media Artist

+91 7593094524 · notreallyzoh@gmail.com · Open to Remote & Relocation · Portfolio: portfolio-zm.onrender.com

PROFESSIONAL SUMMARY

Software engineer with specialized expertise in R&D development across clinical trial systems and creative technology. Demonstrated mastery in building robust, production-grade systems in C++, React, and Python, combined with hands-on experience architecting interactive immersive experiences. Proven mentor with deep technical knowledge in creative computing, generative art, and real-time systems. Bridges analytical rigor and artistic vision to create meaningful solutions.

EXPERIENCE

Creative Technologist & Independent New Media Artist

Adaline & Self-Directed Practice | June 2025 – Present | Remote/Bangalore

• Lead technical mentorship for interdisciplinary creative teams, training in TouchDesigner, Python, and real-time audiovisual systems

• Architect and implement interactive immersive experiences for cultural institutions, festivals, and live performance contexts

• Design and deliver hands-on workshops in creative computing platforms and generative art methodologies

• Build client-facing technical solutions integrating projection mapping, real-time audiovisual production, and interactive installations

Software Development Engineer (R&D)

Cytel | June 2022 – June 2025 | Chennai

• Engineered statistical models and clinical trial design implementations in C++ for mission-critical biostatistics software (East Desktop, Solara, Cytel Innovation Center)

• Developed and optimized production systems in C++, React, and Python; managed cloud infrastructure on Azure with rigorous performance benchmarking

• Migrated legacy C++/C#/XML clinical trial software to modern React, C++, and Azure cloud architecture, improving developer experience and system scalability

• Delivered production code with 90%+ test coverage in complex R&D environments, eliminating technical debt and ensuring memory safety across systems handling sensitive clinical data

• Collaborated with cross-functional teams (statisticians, data scientists, product managers) on feature development for statistical modeling and trial simulation systems

KEY PROJECTS & CONTRIBUTIONS

TouchDesigner Workshop Facilitation – Co-presented 'Translating Process into Public Form' (Bengaluru, 2026) with live demos of real-time audiovisual systems and generative art for emerging practitioners

Node Institute TouchDesigner Initiative – **Technical assistant** for India's first official Node TouchDesigner workshop, establishing foundational frameworks for creative computing education

Festival & Installation Work – Collaborated with Sixth Sense Festival and Berlin-based studio Ephemeral Tomorrow on immersive audiovisual installations and VJing performances

Community Building – Organizing open sessions around creative technologies, fostering digital collectives and practitioner networks in the Indian media arts ecosystem

TECHNICAL SKILLS & EXPERTISE

Core Programming & R&D: C++, Python, C#, React, JavaScript, HTML/CSS, Java, Git, VS Code, Azure cloud, Data structures, Algorithms

Creative Coding & Visual Systems: TouchDesigner, Processing, Open Frameworks, Pure Data, p5.js, Generative art, Real-time audiovisual systems

Hardware & Physical Computing: Arduino, Raspberry Pi, Microcontrollers, IoT, Sensors, Wearables, Electronics tinkering, 3D printing & digital fabrication

Immersive & Performance Tech: Unreal Engine, Projection mapping, VJing, Real-time AV production, Audio pipelines (OSC), Immersive tech (VR/AR/XR), Live performance systems

EDUCATION & CREDENTIALS

B.Tech, Electronics and Computer Engineering | Vellore Institute of Technology (VIT Chennai) | 2018–2022 | GPA: 8.05

Certifications: Google IT Support Professional Certificate (2022) · Security Analyst GOLD (NASSCOM, 2021) · IBM Cloud Native & Multicloud Applications (2022)

PUBLICATIONS & COMMUNITY ENGAGEMENT

Co-Author: Machine Translation using Dictionary-based Techniques – IEEE (2023). Research combining NLP and rule-based approaches for Dravidian language translation.

Leadership & Mentorship: Vice Captain, Dreadnaught Robotics · Creative Head, IEEE Computer Society VIT · Teaching Assistant, VITeach (student social outreach)
